Loran Evaluation Report

Loran's Capability to Mitigate the Impact of a
GPS Outage on GPS Position, Navigation, and
Time Applications

Prepared for the
FEDERAL AVIATION ADMINISTRATION
VICE PRESIDENT FOR TECHNICAL OPERATIONS
NAVIGATION SERVICES DIRECTORATE

March 2004

Loran Evaluation Report – Maritime Harbor Entrance and Approach Requirements

Performance Requirements	Value
Accuracy (back-up)	20 meters, 2 drms
Monitor/Alert Limit (back-up) ²⁴	50 meters, 2 drms
Integrity (target)	3×10^{-5} /hour
Time-to-alert	10 seconds
Availability (minimum)	99.7%
Continuity (minimum)	99.85% over 3 hours

eLoran Definition Document

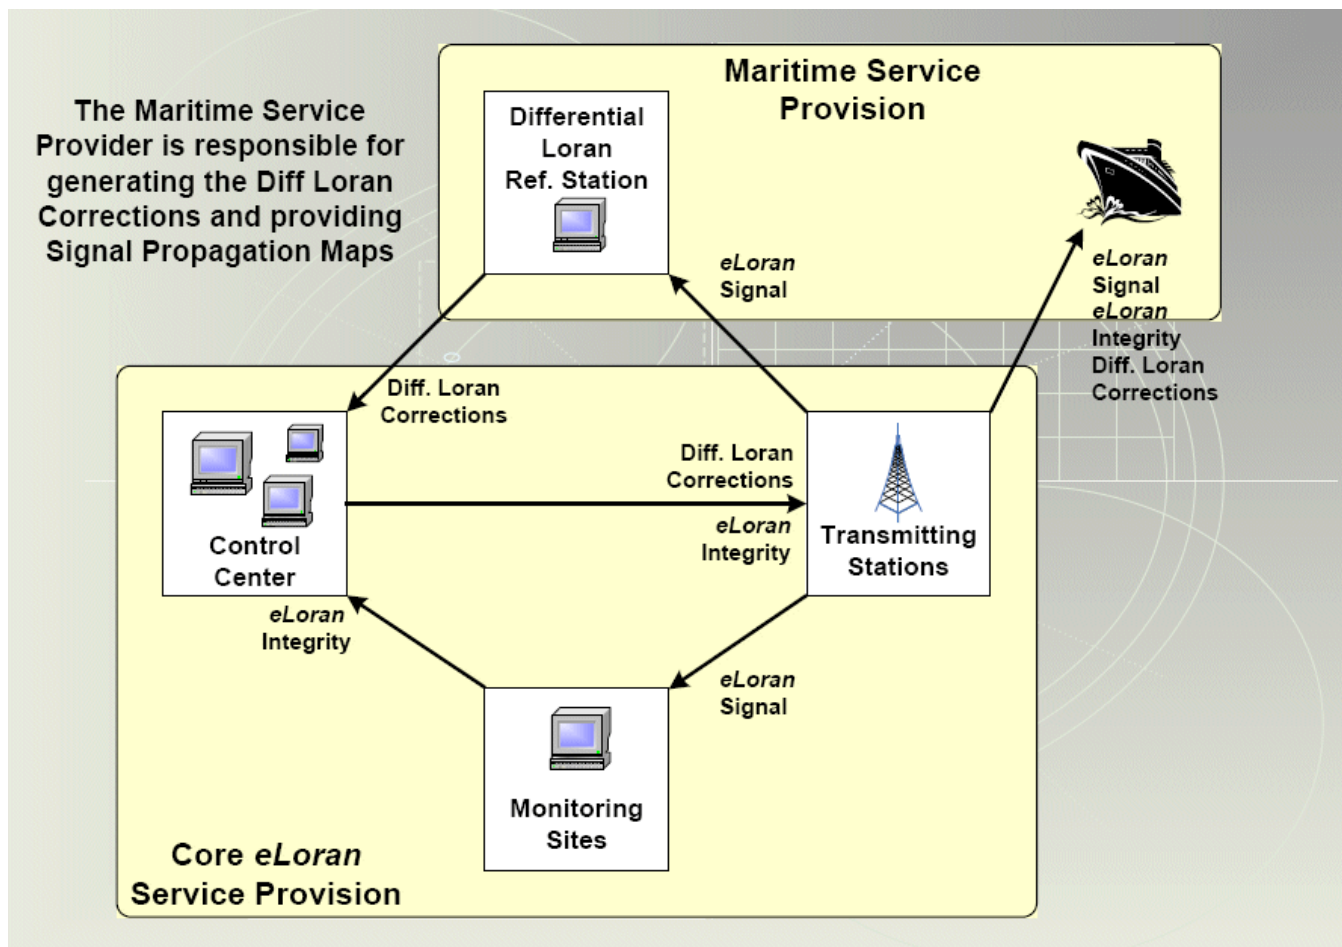

Enhanced Loran (*eLoran*) Definition Document

Core eLoran Service

eLoran Service for Maritime Users

eLoran Service Definition Documents

Document	Description
Plan	Addresses policy, considers operational issues, presents a service description and identifies future developments. It may include a summary of user requirements that are met. Example: US Federal Radionavigation Plan
Performance Specification	Defines the level of performance including coverage that the service provider is committed to providing. It may take the form of a service level agreement. Example: US GPS SPS Specification
Interface Control Document	Defines the signal so that it can be accessed by user equipment. Example: GPS ICD-GPS 200
