

Biography (David Pole):

I joined NATS as a graduate engineer 5 years ago after gaining a BEng in Electrical and Electronic Engineering from Aston University. Since joining NATS I have mainly been involved in working on the European Geostationary Navigation Overlay Service EGNOS. After finishing the NATS graduate training I went on a 1 year secondment working for the ESA (European Space Agency) in the EGNOS Project Office. I currently manage the development and assessment activities associated with a performance monitoring site deployed in Sumburgh along with aiding in the pre operations qualification activities for full integration of an EGNOS MCC into the NATS Swanwick facility.
