

Mr. Jianghui Geng is currently a PhD student in the University of Nottingham. He obtained his BSc degree with the best grade in Geodesy and Engineering Surveying at School of Geodesy and Geomatics in Wuhan University from 2000 to 2004. During the following 3 years he took part in several Chinese national funded projects such as the National Natural Science Foundation, the National High-tech Research and Development Program and the National Fundamental Research and Development Program as one of the main researchers at GNSS Centre in Wuhan University. After coming to UK, he was awarded the prize of New Navigator by Royal Institute of Navigation (RIN) of UK in 2008. His main research interests include precise orbit determination of GNSS satellites and LEOs, and precise point positioning (PPP).
