

Michael Leathem has been the Vice President of Engineering for CrossRate Technology since he co-founded the company in 2004, working on all aspects of Integrated Loran and GPS, and how this relates to Position Navigation and Time. Prior to founding CrossRate Mr. Leathem worked as a DRAM R&D Product Engineer for Micron Technology, and for National Semiconductor as a 200mm Process Integration engineer. Mr. Leathem received his BS in Electrical Engineering from Syracuse University and his MS in Microelectronics Manufacturing Engineering from Rochester Institute of Technology. Mr Leathem is a member of the IEEE, the International Loran Association (ILA), and the ION
