

Renato Filjar is an electrical engineer and satellite navigation specialist. He is a senior research engineer at Ericsson Nikola Tesla d. d., and a lecturer at Faculty of Electrical Engineering and Computing, University of Zagreb, Croatia, Faculty of Maritime Studies, University of Rijeka, Croatia, and Polytechnic of Bjelovar, Bjelovar, Croatia. He holds PhD (2007), MSc (1994) and BSc (1987) degrees in electrical engineering, respectively, from Faculty of Electrical Engineering and Computing, University of Zagreb.

His main professional interests include positioning, navigation and tracking (PNT); space weather and ionospheric effects on navigation systems; modelling, estimation and forecasting; and geospatial web and location-based services.

Dr Filjar is a Fellow of the Royal Institute of Navigation (London, UK), and a Member of the Institution of Engineering and Technology (IET) (London, UK). He is also actively involved in professional networking and knowledge transfer, contributing to organisation of numerous professional events (ENC 2006, Manchester, UK; 1st RIN GNSS Vulnerabilities and Solutions Conference, Baška, Croatia; 6 RIN Croatian Branch professional seminars).
