problems into solutions...ideas into products
We provide multi-modal PNT&D solutions worldwide.

Beyond the Box, Behind the Bear.

UrsaNav is a founding member of the Enhanced Loran Industry Working Group (eLIWG).

We are the exclusive worldwide distributor of Nautel and Symmetricom Loran and eLoran products.

Our personnel have been involved in worldwide Loran systems operation and maintenance since 1969.

Charles Schue, President, CEO of UrsaNav has been nominated by an industry peer as one of "Fifty Leaders to Watch in GNSS."

What's the Buzz?

The latest news includes our recent ranking in *Inc.* magazine's 28th annual Inc. 500|5000, an exclusive ranking of the nation's fastest-growing private companies. UrsaNav was ranked as the 8th fastest growing company in the Engineering division and the 807th fastest growing company overall. We have also been named one of the "Top 25 Best Places to Work in Hampton Roads" by *Inside Business* magazine for three consecutive years, including the #1 Best Place to Work for 2009 in the Mid-Sized business category. Also in 2009, the Hampton Roads Chamber of Commerce listed us as one of the "Top Ten Businesses to Watch".

You can rely on the UrsaNav team.

A Message from our President...

“UrsaNav is an advanced engineering and IT solutions firm. Our focus within the PNT&D (data) community is on developing and deploying GPS-based and non GPS-based solutions for the legacy transformation, irregular warfare, interference-enabled crime fighting, and counterinsurgency (COIN) operations markets.

GPS is ingrained in our lives like time, electricity, and water. Without it, there could be chaos in many sectors at the same time. Filling gaps in GPS service to the public and private sectors, from undersea to the moon, using eLoran, INS, 3D sonar, and similar technologies is a necessary component of our ability to always be prepared.”

Behind the Bear-Who we are

Our company was founded in 2004 as a Service-Disabled, Veteran-Owned Small Business (SDVO SB) specializing in advanced engineering and technology solutions, and associated professional services for the federal government. To coin a phrase: we are "Born from Vets!" Starting with just a handful of employees, the company has nearly doubled in growth each year for the last five years. With the acquisition of an IT firm, and a records management company, UrsaNav has expanded its services to include IT (hardware and software) and Information Management solutions.

Our People

At UrsaNav, we have combined our experience in the government and commercial sectors to provide the full suite of professional engineering and IT solutions you seek, including design, development, test and evaluation, installation, and deployment. We stand behind our solutions with the appropriate level of underlying support you need: administration, program and project management, logistics, depot repair, 24x7 flyaway availability, documentation, and training.

At UrsaNav, we stand behind our solutions with the appropriate level of underlying support you need.

Choose our eLoran solutions to modernize or upgrade your legacy Loran system or for entirely new service. In GPS-denied environments, choose our eLoran solutions for irregular warfare operations, interference-enabled crime fighting, additional security at high-profile events, and counterinsurgency (COIN) operations. Our state-of-the-art solutions provide significant Size, Weight, and (Input) Power reductions over other technologies. Decrease operations, support, and personnel costs. Increase accuracy, availability, continuity, reliability, and efficiency.

At UrsaNav, Inc. we make it our business to make your business succeed.
